

# HOMEGROWN NATIONAL PARK

bring native plant education to your school

## SCHOOLS PROGRAM

### The Opportunity

Reconnect students with nature through an 8-week, place - based curriculum tailored to local ecosystems.

- Aligned with science and environmental literacy standards
- Hands-on learning and outdoor exploration
- Culminates in planting a native garden on school grounds

### Why It Matters

- Boosts science engagement and environmental awareness
- Builds a personal connection to nature and place
- Leaves a lasting, living impact on school grounds
- Sparks curiosity, leadership, and community pride

### Partner with Us

As low as \$25 per student covers materials, curriculum, native plants, and ongoing support

### Your Organization Can:

- Sponsor a school or an entire district
- Align with sustainability and education goals
- Host volunteer planting days
- Create a visible, local community impact

Currently Piloting in Chattanooga, Tennessee  
7 schools | 500+ students | Fall 2025

### Let's bring it to your community next!
