What you can do on the map

Pin your habitat
Add your native plantings to the map. No account needed to explore — sign up free to track your impact and connect with neighbors.

Discover local organizations
Find native plant societies, nurseries, landscapers, and community projects near you. Zoom in — your community is already active.

Take a seasonal action
Commit to Leave the Leaves, winter sowing, less lawn, or another seasonal step. Small actions add up fast when thousands do them together.

Add your organization
Running a native plant society, nursery, or restoration project? List it so others can find you and join forces.

Start in under a minute

No ecology expertise needed.
No account required to explore.
Search your area, find what's growing near you, and add your own habitat when you're ready.

Add your habitat for free in less than a minute.

Daily activities that support biodiversity

Ditch fogging for buckets
An alternative to pesticide spraying that controls mosquitoes without harming bees, wildlife, or people.

Protect caterpillars
Unlocking monthly steps to protect caterpillar habitats and discovering which caterpillars might already be living in their backyard.

Take the Wildr quiz
A free 5-minute quiz that scores a habitat's ecological health and gives a custom roadmap to improve it.

Add native habitat
Adding habitats and becoming part of a national movement — one native plant at a time.

The native plant movement was invisible. We're changing that.

Thousands of people are planting native species, pulling invasives, and restoring habitat in backyards, schoolyards, and community spaces across the country. But they couldn't find each other — or see the scale of what they were doing together.

Every pin is a person, a project, or a place. Together, they're building a national park from the ground up.

Who's already on the map?

- **K-12 Schools**
  Outdoor learning centers, eco clubs, nature schools
- **HOAs & Communities**
  Neighborhoods converting lawns to habitat
- **Faith Communities**
  Churches, temples, and meditation gardens
- **Conservation Groups**
  Land trusts, watershed stewards, native plant societies
- **Local Government**
  City parks, public lands, library districts
- **Nurseries & Landscapers**
  Growers and designers specializing in native plants
- **Farms & Businesses**
  Corporations, breweries, farms, and arts spaces
- **Universities**
  Botanic gardens, sustainability depts, research programs
